

We strive to fulfill all your design needs with services ranging from Concept to Development. JVV Design offers a technical skill to produce high quality layout designs and space planning. Previous work has offered experience into various industries including Store planning, Shopfitting, Office planning and Interior Design.

## FLOORPLANS

We are able to create floorplans from measurements taken on site, as well as hand drawn layouts. Our capabilities within Revit Autocad allows us to customise any plan and layout to the desired look and feel that the client prefers.

By creating a client specific template, we can assure your Brand identity will be reflected on the design. This services can be completed within 24hours of receiving all the necessary measurements.

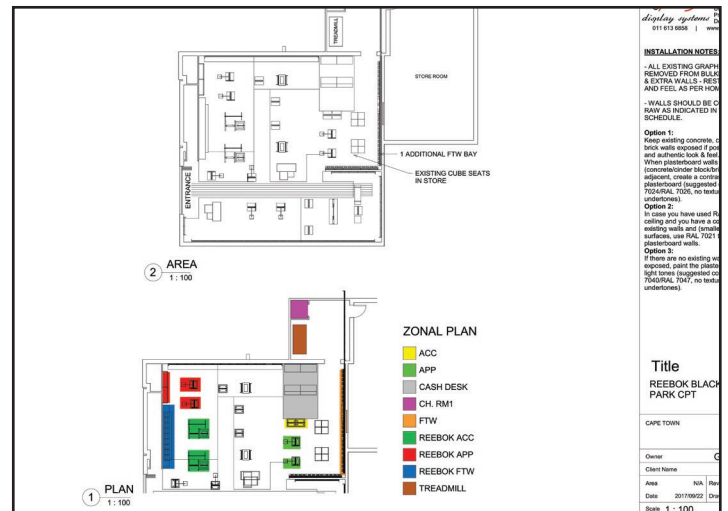

## SPACE PLANNING

Why change a space multiple times, when you can move and plan all your furniture and unites electronic. We can create a layout for your entire space, wheather it be an office, factory, store, loft or restaurant.

This service goes hand-in-hand with our 3D BIM Modelling design. Each project is different depending on the level of detail the client prefers, but the outcome stays the same... A well executed layout, due to great planning.

## 3D DESIGN

All floorplans can be Rendered and presented in a 3D capacity. Custom units can me modelled up to showcase your latest new product and designs before it is manufactured. This service is helpful when doing space planning for a store, restaurant etc. In the end when presenting a final design, a 3D model is vital to present a visual concept.
